

IBM Public Cloud

Vito Leotta

Italy Manager of Public Cloud, IBM

Enterprises want to accelerate business transformation

They want to leverage cloud to...

Unlock new opportunities
and build customer loyalty

Reduce business risk

Digitalize operations and
gain efficiencies

However, the journey to cloud is difficult...

Lack of skills to
successfully transform

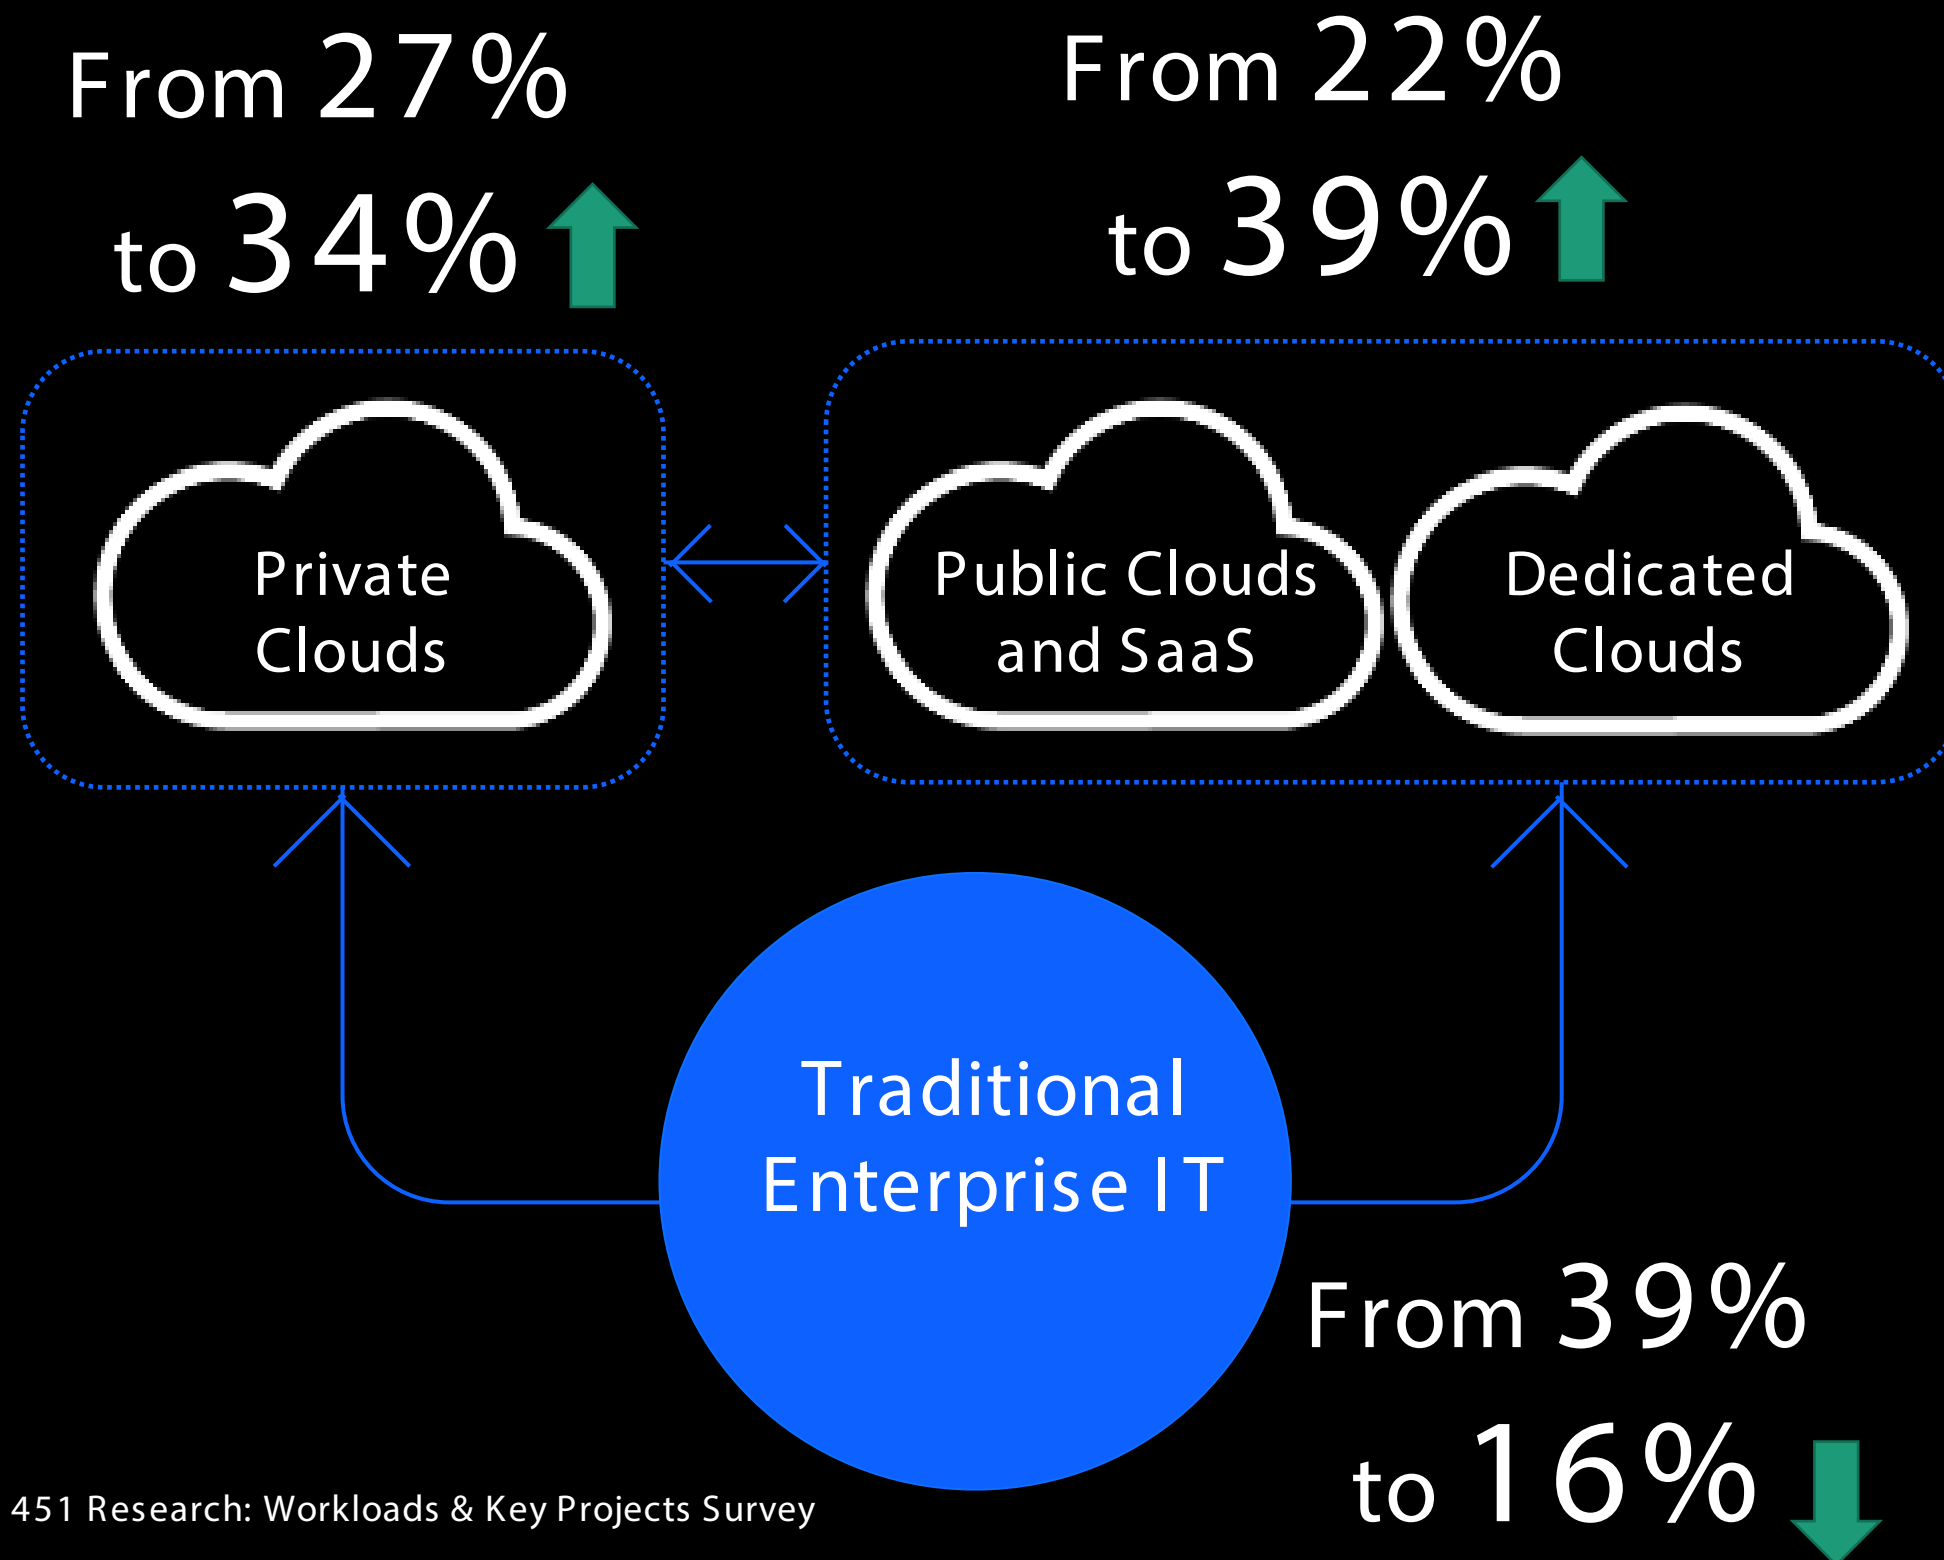

Incomplete strategy can raise
costs and cause lock-in

Regulatory environment requires
highest security standards

IBM's hybrid cloud platform architecture focuses on removing this friction and accelerating our customers' transformation

We have a large and growing market as part of 'Chapter 2'

Source: 451 Research: Workloads & Key Projects Survey

Only

20%

of enterprise workloads have moved to the cloud

Between 2019 and 2021, clients are migrating more – but inconsistently

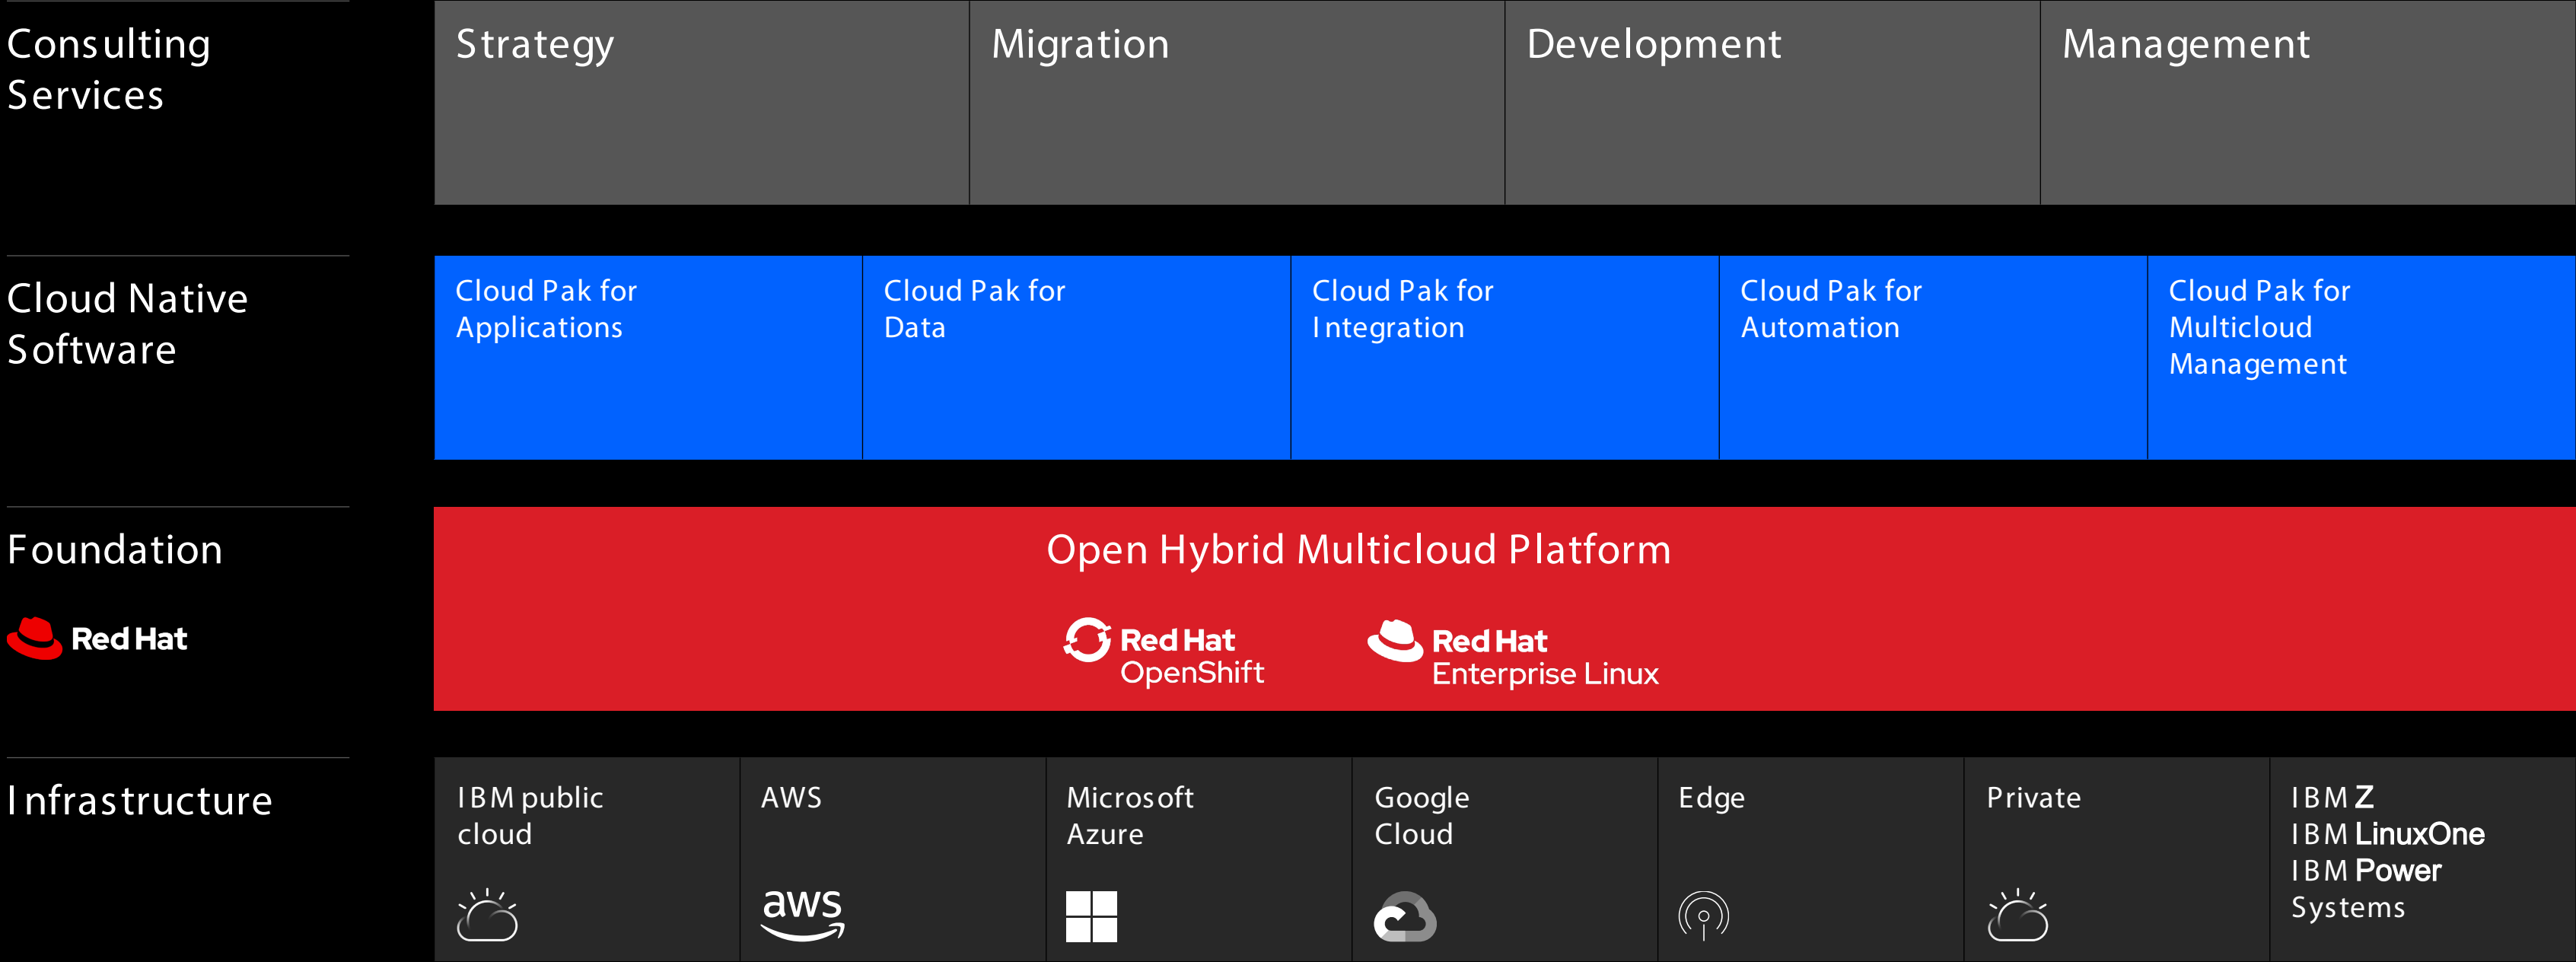

On average, enterprises use

5 Clouds

serverless apps

IBM Cloud: The most open and secure public cloud for business

Open Innovation

- 19K+ clusters in production
- Major contributor to open source
- Red Hat Openshift

Innovation

↑ Cost ↓

Security Leadership

- Highest compliance for data encryption
- IBM cannot see your data
- Profiles and templates

Risk ↓

Agility ↑

Enterprise Grade

- VMware Dedicated & Shared
- Power (AIX, IBM i)
- SAP certified IaaS on IBM Cloud

Investment protection

↑

Highest level of encryption

FIPS 140-2 Level 4

Isolation for cloud native

ROKS and containers on bare metal

No data egress charges with Cloud Databases

No vendor lock in and lower TCO

No-cost bandwidth between regions

Significantly lower TCO

Enhanced availability SLAs

HA: 99.99%, Non-HA: 99.9%

Higher SLA payouts versus market

25% of monthly at 60 minutes

Audit transparency to bare metal

Traceable serial number compliance

Full control to bare -metal level

Full admin control of compute

World's First Financial Services-Ready Public Cloud

Good Design Award for VPC

Good Design Award for API Connect

Customer Choice Award for Cloud IaaS

Stratus Award for User Experience

Gold Indigo Award for IBM Cloud App ID and Assist Me

IBM Power AI X&i on IBM Cloud

Enterprise Grade

- IBM Power Virtual Server available for AIX & System I in pay per use on IBM Cloud portal also on SAP, Sap4Hana & Oracle
- Power Infrastructure:
 - Power as an offering that is scalable, resilient and production-ready.
- Cloud Capabilities:
 - Op/Ex, self-service, fast delivery, elasticity, connectivity to x86 and other cloud services
- This provides the enhanced security of dedicated infrastructure and the flexibility of a virtualized environment

SAP certified IaaS on IBM Cloud: value proposition

- IBM Cloud with the **best performing servers** for SAP on the market
- **Certified** configurations for Hana / non-Hana, and for dev, test and production
- **Free of charge inter-DC connection**: SAP instances can be deployed in different geographies and communicate on unmetered network
- Unique, long-term **IBM partnership with SAP**

Very aggressive pricing per core for SAP certified servers.

This gets more evident for high-end SAP servers (4TB, 8 TB, 12TB of RAM)

Red Hat OpenShift on IBM Cloud

As-a-Service (Managed)

- **Automated provisioning with just 5 click (installation, configuration, & upgrades with Master node managed by IBM)**
- Patch management, scaling
- Performance tuning
- 24/7 global SRE support

Resilient and Secure

- **Automatic multizone deployments with auto recovery**
- Security hardening, compliant
- **Enterprise delivery options including (IBM uniqueness):**
 - **Public Cloud Multitenant**
 - **Dedicate Cloud Bare Metal**
 - **Virtual private clusters VPC**

Complete Platform

Integrated with IBM Cloud - Built In for:

- Monitoring
- Logging, Encryption
- Backup/DR
- Storage, COS Volumes
- Security Advisor
- Service Catalog
- Container Registry and Vulnerability Advisor.

- Available in:
- 6 Multi Zone Regions
- Single Zone Regions: Milan, Montreal, Paris, Seoul, Singapore, Toronto, Chennai

Thanks!

Red Hat

Open Hybrid Multicloud Platform to fuel innovation

Giorgio Galli

Manager Solution Architect Team, Red Hat Italy

Open source fuels rapid innovation and Red Hat bring to Enterprise

We see common needs & challenges

Hybrid cloud infrastructure
Build the foundation for the
future, while managing costs to
speed progress

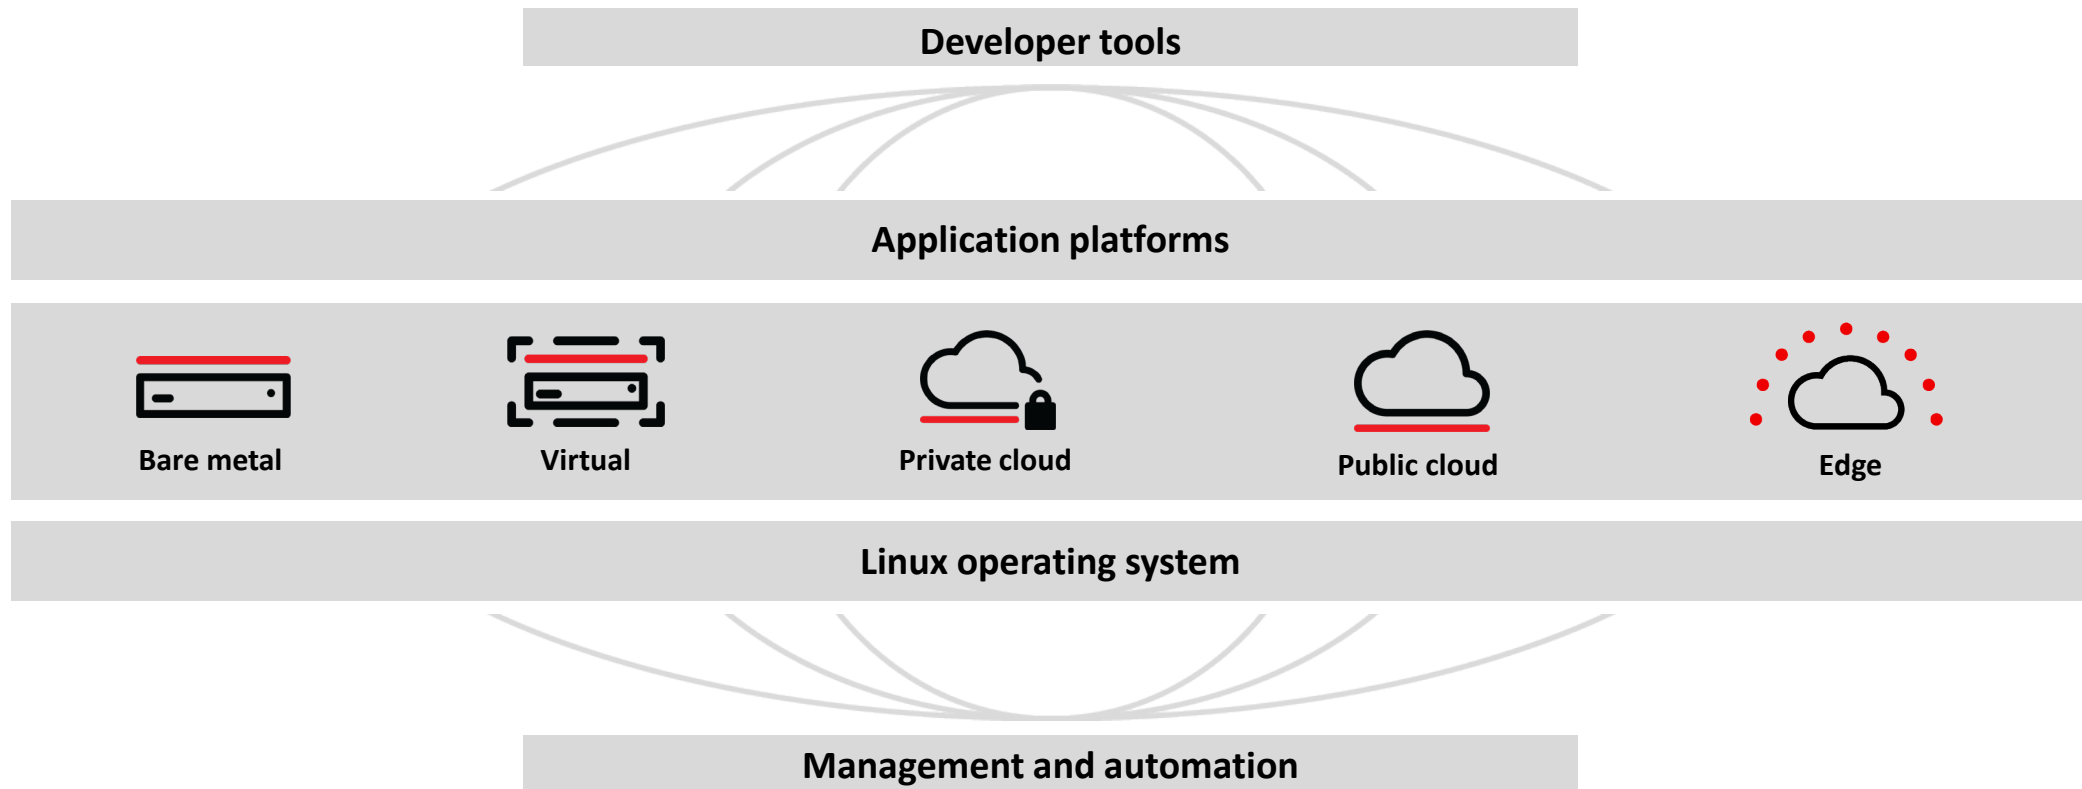

Cloud-native development
Accelerate application
development, innovation,
& delivery

IT automation & management
Automate infrastructure &
applications so you can do more
without sacrificing stability

Red Hat Open Hybrid MultiCloud – The New Norm

Any workload , any footprint , any location.

Red Hat Open for Hybrid MultiCloud

Open hybrid cloud

Hybrid cloud infrastructure

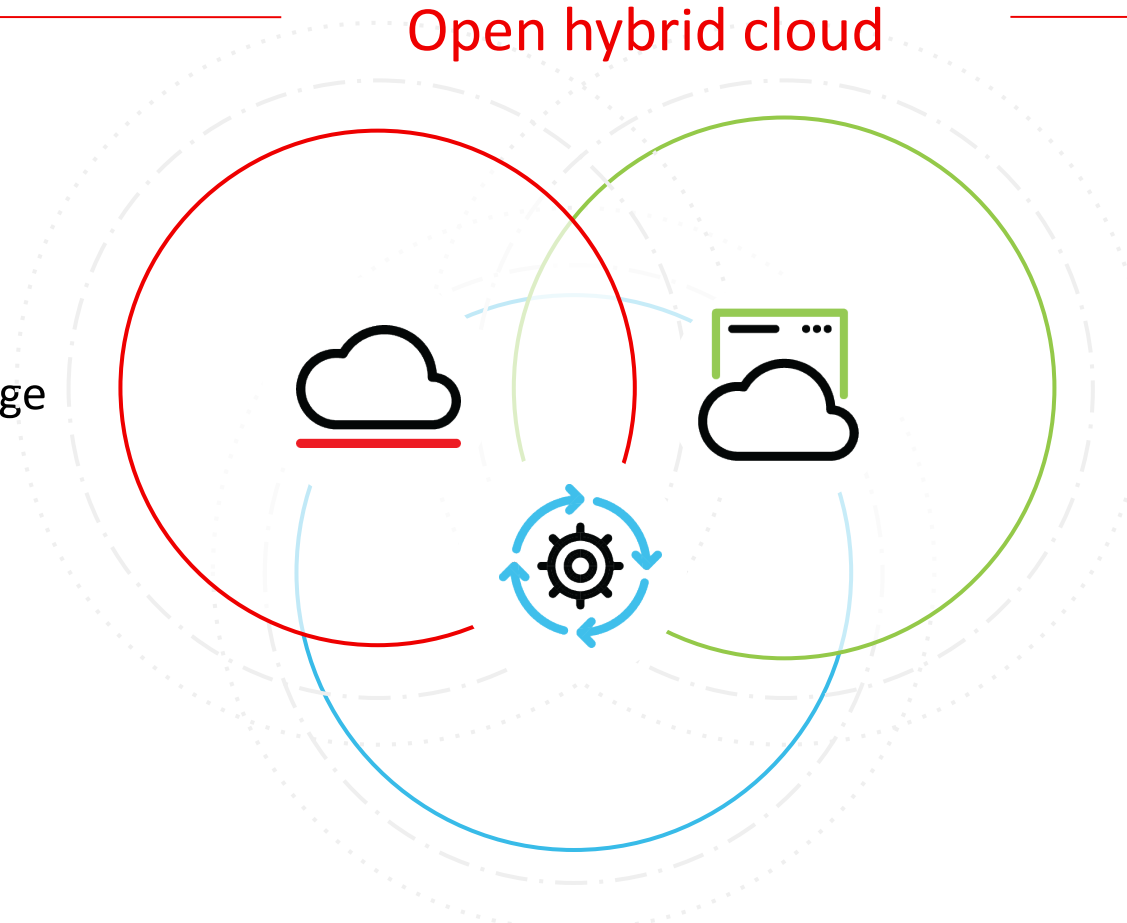

Secure, scale, & manage foundations for traditional & cloud workloads across all environments.

Cloud-native development

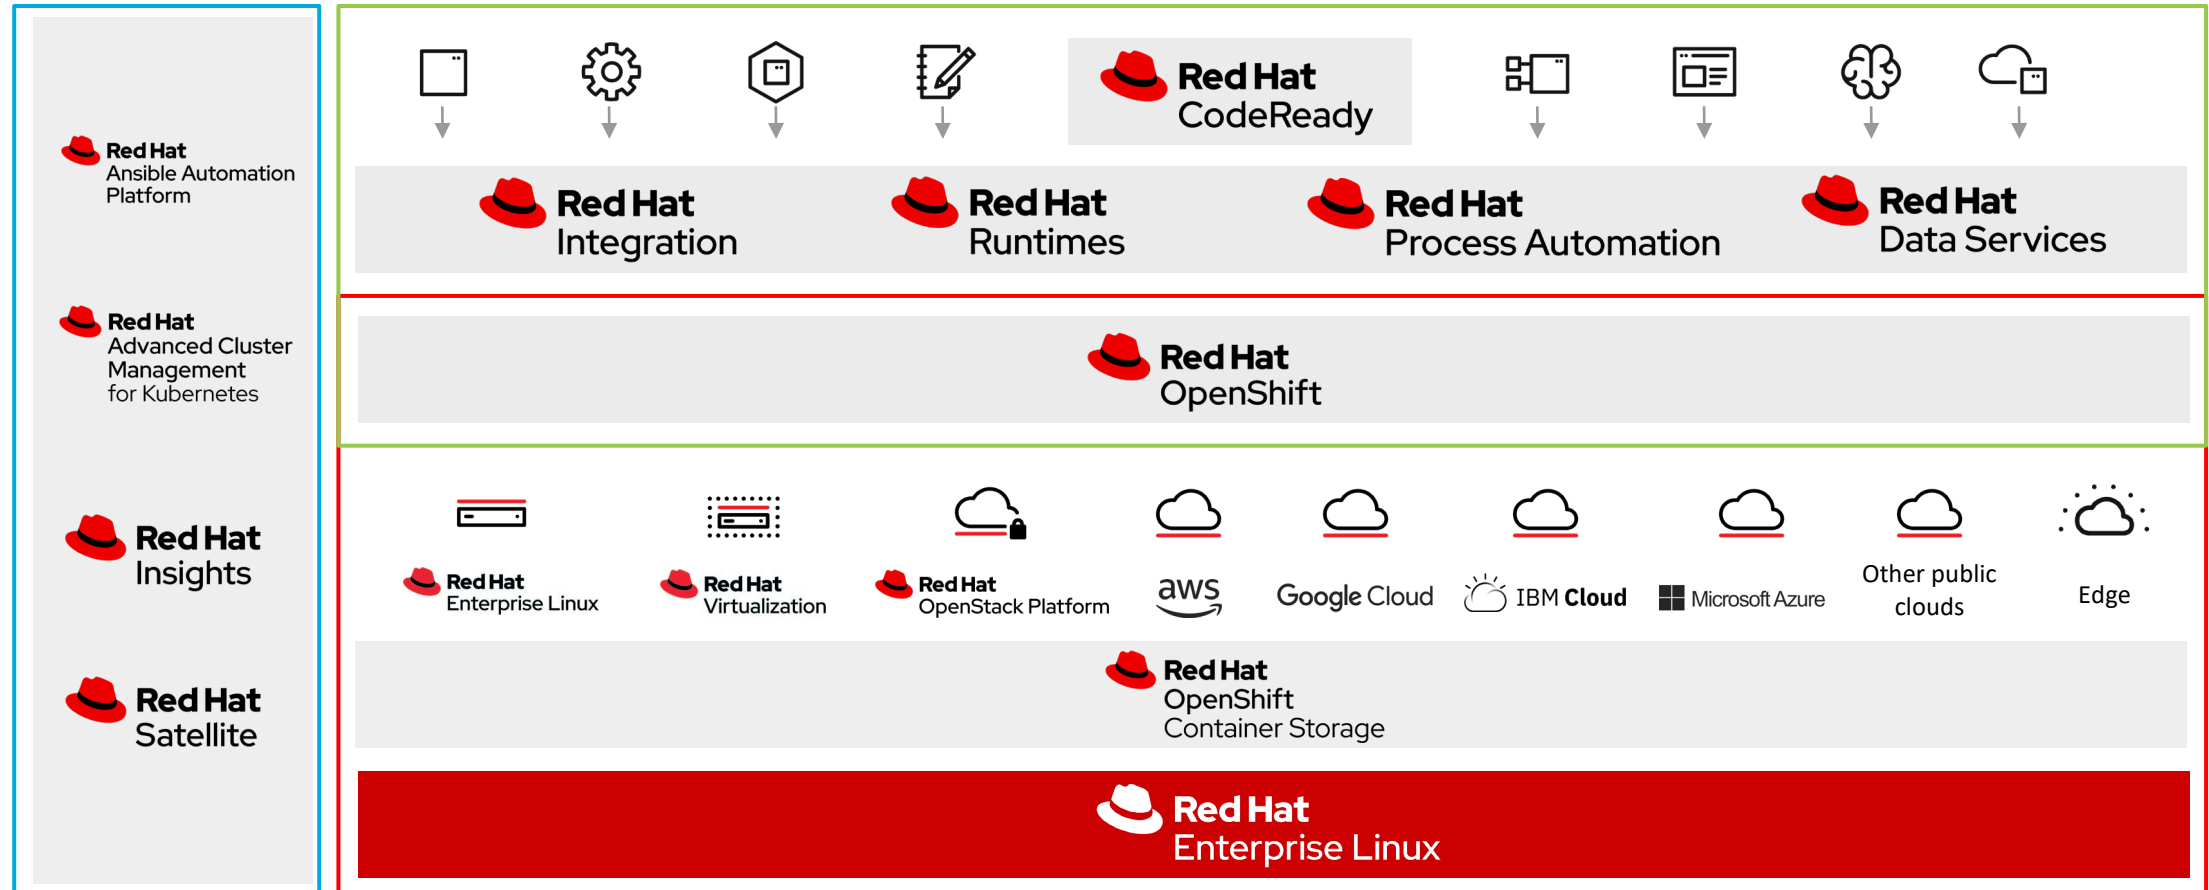

Based on the leading container-based Kubernetes platform. Develop, deploy, & manage any application, on any environment & give developers what they need to innovate.

Management and automation

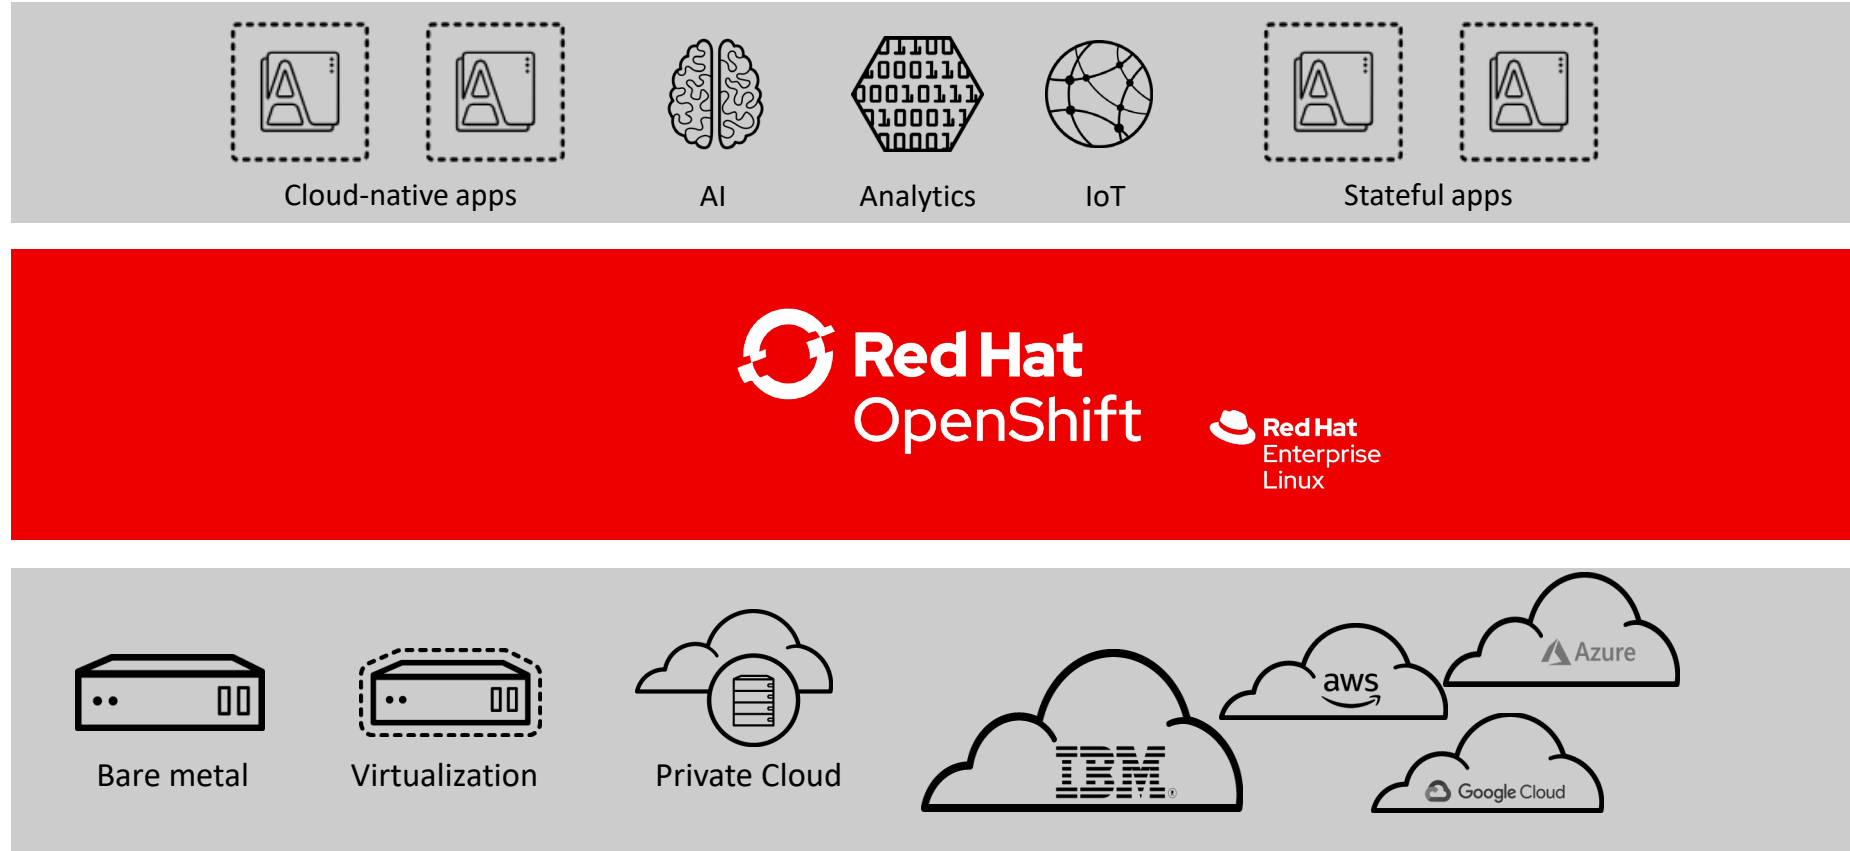

Easily & seamlessly manage Red Hat platforms and automate across hybrid environments.

Addressing these challenges with a broad portfolio

Addressing these challenges with a broad portfolio

“[Red Hat] OpenShift is the most widely deployed multicloud container platform and boasts powerful development and unified operations experiences across many public and on-premises platforms. Red Hat pioneered the “operator” model for infrastructure and application management and provides a rich partner ecosystem and popular marketplace.”
